

Makino & Mori Seiki Drum Filters

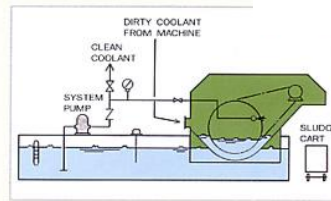

Makino & Mori Seiki Drum Filters

Example Picture of A-55 Filter Set

Stock Filters Include; Makino A-88, A-55, A-55E, A-51 & Mori Seiki NH 5000
Other Types Available Upon Request With Sample Provided.

Why Pay Over \$1000.00?

How about
\$369.00 per set instead?

* Filters are an aftermarket design not manufactured by Makino or Mori Seiki

*We have a superior mesh design that will outlast their existing design, by not allowing in the larger chips that grind away at the finer Mesh.

*We can manufacture other drum type filters to customer specs with samples.

* Pricing is specific to sets of three or one longer continuous filter.

*The finer filter mesh consists of 150 micron nylon, mono-filament with border a nylon herringbone webbing.

*The heavier nylon mesh is not quite as open as the original Makino / Mori, but allows more than adequate coolant flow and better resistance to chip intrusion, thereby significantly extending filter life.
